

DERMATOLOGY INSTRUMENTS

Professional Dermatology Catalogue

AURA Surgicare

Professional catalogue for hospitals, surgical professionals, healthcare institutions and distributors.

Trusted Advisors

Our knowledgeable team can assist in navigating today's changing health care landscape through:

- Revenue Enhancement
- Cost Containment
- Staff Training and Support
- Practice Education
- Technology

Price Integrity

We are highly competitive with our pricing and strive to maintain prices through the development of purchasing plans, GPO programs, and by delivering the best value for your practice.

Guaranteed Fast Delivery

Orders received by 5 PM local time are shipped the same day. Your products arrive within 24–48 hours in most areas.

Vaccines, Pharmaceuticals, and Diagnostics

We supply every adult and pediatric vaccine recommended by the ACIP. In addition, we can fulfill your flu vaccine needs with our Worry-Free Guarantee Influenza Vaccine Program. Our pharmaceutical and diagnostic solutions include brand names, a complete line of generics, and Henry Schein Brand options.

Practice Solutions

A complete array of services, from Technology Solutions to Practice Marketing, is available to help you achieve your practice goals.

Henry Schein Cares

We are Helping Health Happen by expanding access to care for at-risk and underserved populations.

In 2017, our Healthy Lifestyles, Healthy Communities program will provide free health screenings to over 8,500 children and their caregivers in 14 U.S. cities.

We need your support to continue our program.

To make a donation or learn more about our programs, visit: www.hscaresfoundation.org.

The most recent issue of *Dermatology World* (aad.org/dw) notes the increasing challenge of providing access to dermatologic care, citing provider shortages, an increase in skin cancer diagnoses, and an aging population.

The article notes three options that can improve access to care:

- Urgent care dermatology clinics to ensure that referrals who need dermatology expertise the most have a better chance at getting it as quickly as possible
- Group medical appointments that deliver improved ease of access because there may be more room to book someone sooner into a group than a traditional clinic
- Delegating care through non-physician clinicians, which allows more patients to be seen by someone with dermatology expertise—dermatologist-trained physician assistants can see patients with common issues, while patients with more complex problems are scheduled to see a dermatologist

Wherever your practice is headed, rely on Henry Schein for products and supplies for all your dermatology needs.

**P R E F E R R E D P R O V I D E R**

Practical resources, discounts, and enhanced buying power. And that's just scratching the surface of your benefits.

Henry Schein Medical is a proud AAD Preferred Partner. That means you can take advantage of our Provista-based Member Buying Program, which includes a comprehensive, cost-effective skin health offering to treat chronic conditions such as acne, psoriasis, and dermatitis while providing options to service the aesthetic and pathology sides of the practice.

Our partnership delivers not only the products that improve the health of your patients, but also the resources that improve the health of your practice.

Introducing our expanded family of **MINOR PROCEDURE KITS** Suture/Staple Removal Kits

Suture Removal Kit with Plastic Handle Instruments (900-4687)

Flatter, thinner-blade scissors provide easier suture removal by allowing blade to slip under suture.

Hard Plastic Tray includes:

- (1) 4½" Littauer Plastic Handle Scissors (hook tipped)
- (1) 4" PosiGrip™ Plastic Thumb Forceps
- (1) 3" x 3" Gauze Sponge

Suture Removal Kit with Iris Scissors (112-5822)

Hard Plastic Tray includes:

- (1) 4½" Small-Loop, Straight Metal Iris Scissors (sharp/sharp)
- (1) 4¾" Serrated Metal Forceps
- (1) 3" x 3" Gauze Pad
- (1) Large Alcohol Prep Pad

Suture Removal Kit with Littauer Scissors (570-0619)

Hard Plastic Tray includes:

- (1) 4½" Metal Littauer Scissors (hook-tipped)
- (1) 4" Metal Forceps
- (1) 3" x 3" Gauze Sponge

Suture Removal Kit with PVP & Alcohol Prep (570-0618)

Hard Plastic Tray includes:

- (1) 4¾" Stainless Steel, Straight Iris Suture Scissors (sharp/sharp)
- (1) 4¾" Stainless Steel, Adson Serrated Forceps
- (1) 3" x 3" Gauze Sponge
- (1) Large Alcohol Prep Pad
- (1) Iodophor PVP Prep Pad

Staple Removal Kit (570-0620)

Used to easily remove surgical staples from patients with minimal discomfort.

Hard Plastic Tray includes:

- (1) Stainless Steel Skin Staple Remover
- (1) 3" x 3" Gauze Sponge

All products are available to order by the individual kit. All kits are sterile, single-use, and do not include natural rubber latex.

Topical Skin Adhesive

Flexible Skin Adhesive Pack with Applicator Tips (112-7158)

10 Ampules w/tips/box

- Beveled Tip allows for a smoother, broader layer of skin adhesive
- The flexible skin adhesive provides BOTH the tensile strength of a Butyl formula and the flexibility of an Octyl formula
- Ampule can be used with or without the tip

All versions of our Topical Skin Adhesives are

- FDA-approved liquid adhesive consisting of n-butyl-2 cyanoacrylate
- Highest bond strength of all topical tissue adhesives on the market
- Inhibits growth of bacteria
- Sterile, single-patient-use plastic ampules
- Provide a precise, controlled application
- Will not clog or dry when opened

BD SafetyGlide™ needle

- The BD SafetyGlide needle has Activation-Assist™ technology, making a safe injection easier and more efficient.
- Fluid single-finger activation requiring minimal training and virtually no change in clinician technique.

BD Eclipse™ needle

- The BD Eclipse needle provides streamlined and effective injection safety.
- Wide textured finger pads and flanges prevent slippage and help you quickly find the safety mechanism.

BD Integra™ retracting syringe

- The BD Integra retracting syringe is designed to have low waste space. Low waste space may result in reduced medication waste.
- Activation can occur before or after the needle is withdrawn from the patient.

Safety Hypodermic Needles and Syringes

Features & Benefits:

- 3 single-handed safety activation methods: hard-surface, thumb, or finger
- Double-locking mechanism with an audible "click"
- Needle hub-compatible with all standard Luer lock and Luer slip-tip syringes
- ISO color coded—easy and quick identification of the needle gauge
- Bevel-up needle—allows for low angle injections

Conventional Hypodermic Needles and Syringes

RELY ON US FOR QUALITY, SELECTION, PERFORMANCE, AND VALUE!

We make needles that
make everyone comfortable.

A lot hinges on having the right needles.
That's why Terumo's SurGuard®3 offers some
very convincing benefits.

- **Sharper** – Patients benefit from a more comfortable injection, as our needles are 20%* sharper than the market leader
- **Safer** – Safety mechanism includes a lock for both the needle and the hub, and is designed to minimize the ability to be removed
- **Smarter** – Clinicians can choose how they activate the safety mechanism using their finger, thumb or hard surface as dictated by the clinical situation

POWDER-FREE: OUR TIME IS NOW

Powder-free gloves have long been shown to be much safer for both patients and healthcare workers. Effective as of January 18, 2017, the FDA has banned the use of powdered surgical gloves, powdered patient examination gloves, and absorbable powder used for lubricating surgical gloves. The FDA ruled these products present unreasonable and substantial risk to healthcare providers, patients and other individuals.

Ansell is ready to provide the **solutions you need** with the addition of the ENCORE® Perry® Style 42® PF to our already broad ENCORE® PF product range.

Midmark® 641 Power Procedure Chair

This chair offers maximum accessibility to your patient, versatile positioning, and premium patient comfort for such aesthetic procedures as dermatology, plastic surgery, and ENT. Delivers maximum head and neck access.

- Narrow patient support surface and slim back section provide required accessibility; work closer to patient with proper posture, and be injury-free
- Tuck-away side rail for improved access to patient; extend for mounting accessories, and to adjust, simply loosen knob, position rail, and tighten knob
- For proper patient positioning, powered movement of seat, back, foot, and tilt offer multiposition capabilities, improving comfort and reducing likelihood of injury
- Premium Comfort System™, advanced elastomeric material stretched over a seat cutout, enhances patient comfort for a chair-like feel in a procedure table
- Optional rotation: allows patient to be repositioned instead of the device
- Optional one-touch positioning: press a single button and all sections move simultaneously from chair (or any position) to flat position (or any programmed position). 4 Favorite positions can be stored
- Optional wireless controls: remove cords and eliminate obstacles; enjoy freedom of locating hand and foot control anywhere in the room
- Optional chair arms: upholstered and contoured for comfort

VISIO-TEK medical microscopes are a line of versatile and portable digital tools that utilize both Wi-Fi or USB transmission to facilitate patient examinations in hospitals, doctors' offices or surgery centers.

VISIO-TEK can be connected to iOS and Android smartphones or tablets via the VISIO-TEK App, as well as through a Wi-Fi / USB connection to Windows and Mac computers, laptops or wall mounted Wi-Fi screens in your examination room.

Now you can easily capture pictures, shoot videos and take measurements.

VISIO-MDP5 and **VISIO-MDUVP** are two **polarized** demascopes to be used as a non-invasive, diagnostic tools, which visualize subtle clinical patterns of skin lesions and subsurface skin structures not normally visible to the unaided eye, without any need of linkage fluids, like oils. **VISIO-MDUVP** can also be used in trichology, beauty and rheumatology to check capillary status.

ADDED ADVANTAGES

- Facility of storage of images
- Results immediately available
- Inbuilt illuminating system
- Adjustable magnification
- Ability to assess structures as deep as in the reticular dermis
- LED technology: high intensity white light and consume 70% less power than halogen lamps. Designed to emit lights of different colors (like UV Light) for better visualization of the skin.
- Ability to record images and video
- WIFI connection
- USB connection
- Dedicated App and Software
- Multiple vision on connected devices
- Archived images of the patient can be compared with new ones and alert any significant change in lesion.

THE PORTABLE
DIGITAL MICROSCOPE
WITH INTEGRATED WI-FI

WelchAllyn®

EpiScope™

More Accurate Diagnosis, 3.5 V

Bright halogen illumination and advanced 10X optics system ensure true tissue color and accurate identification of suspicious, pigmented skin lesions, such as basal-cell carcinoma versus malignant melanoma, by providing ability to magnify, illuminate, and measure. Attaches to any Welch Allyn 3.5-V battery power source.

EpiScope Set

CryOmega

Disposable cryosurgical unit containing a 16-g nitrous oxide (N₂O) cartridge. With a lower operating temperature compared to canister-based systems, CryOmega provides clinically effective freezing with pinpoint precision. Simple to use: activate the internal cartridge once and the device is ready for use. No need for additional accessories or replacement cartridges. Delivers 30 to 45 5-second sprays per device.

- Effective: Delivers a continuous, direct spray of nitrous oxide (-89°C) to treatment site
- Economical: Low-cost, effective cryosurgery in any clinical setting
- Disposable: Simply dispose of the entire unit when the internal cartridge is empty
- Convenient: Simple, hassle-free operation
- **Made in the USA**

HENRY SCHEIN®

High-Frequency Desiccator

Designed and engineered to be the most reliable and durable desiccator available today, this unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Post-procedure and long-term cleanup are simplified by its nonabsorbing, nonstaining, high-impact plastic case.

- 40-watt high-frequency desiccator
- Adjustable in 1/10-watt increments in the first 10 watts, in monopolar and bipolar
- More accurate power with Universal Power Control 100-240 VAC
- Less to do and less to buy makes this the most cost-effective and user-friendly unit on the market
- This desiccator is a ground reference unit, which means no grounding pad is required
- 4-year warranty

#A942

(570-0583).....ea

HENRY SCHEIN®

Electrosurgical Generator and High-Frequency Desiccator

This electrosurgical generator is a high-frequency desiccator with cutting ability. One half of the unit is the Henry Schein High Frequency Desiccator. The other half is an electrosurgical generator that features 50 watts of cutting power and coag capabilities—plenty of power for most cutting procedures performed in the doctor's office.

- 40-watt high-frequency desiccator
- 2 machines in 1 convenient package
- Adjustable in 1/10-watt increments in the first 10 watts, in monopolar and bipolar
- No grounding pad is required during desiccation mode
- 4-year warranty

Hyfrecator® 2000

Electrosurgical Unit

Dual-microprocessor technology makes it one of the safest units for in-office procedures. Controlled Tissue Response™ minimizes tissue damage, resulting in excellent clinical outcomes. Over \$100 in accessories included at no extra charge.

- Procedural versatility: With a multitude of applications in such diverse specialties as dermatology, plastic surgery, gynecology, dental and oral surgery, ophthalmology, otolaryngology, proctology, and urology, this unit lets you perform a wide variety of desiccation, fulguration, and coagulation office procedures. Includes 50 blunt and 50 sharp, non-sterile disposable hyfrecator tips.
- Precise power settings: Digital 2/10 incremental readouts in the critical 0–5-watt low-power range enhance your skill, accuracy, and control when performing delicate procedures.
- Convenient fingertip control: ergonomic, handheld pencil enables you to remotely activate the unit and make rapid or slow power adjustments.

Tissue-Tek® Cryo® Flex Cryostat

Produces superior sections from 1 µm to 99 µm, using a temperature-controlled blade holder and a 3D precision chuck to accurately align the block face to the blade, reducing the operator's trimming time and preserving specimens. The sturdy chuck retains its position when locked and unlocked, eliminating any time and effort spent realigning the cutting angle.

- Users can now leverage the newly developed anti-roll rake that was designed to best mimic the preferred and widely accepted "brush technique" to prevent sections from rolling, which additionally reduces the learning curve of new users, making them proficient faster
- For the first time in the history of cryotomy, Sakura successfully integrated its advanced remote diagnostics technology platform, iSupport, into the hardware and software of the Cryo Flex
- A color touch LCD screen provides a visual display of critical sectioning information such as current chamber temperature, section thickness, and trimming thickness
- The motorized advance and retract keys allow smooth, precise orientation of the 3D precision chuck to the blade holder. The blade holder accommodates Accu-Edge high- and low-profile disposable blades
- The Tissue-Tek Cryo Flex D and DM models offer innovative options like motorized sectioning, ozone disinfection, and a vacuum debris removal system. The Cryo Flex now uses a more efficient and patented ozone technology to safely protect operators from pathogens in between weekly decontamination requested by CAP accreditation guidelines. The combination of ozone, UV, and elevated temperatures provide unprecedented disinfection with a reduction of up to 5 logs for the SV40 virus.

Histological Freezing Spray

For use in histology laboratories, our moisture-free and nonflammable freezing spray is used to flash-freeze tissue specimens in the cryostat, or harden difficult-to-cut tissue on the microtome during sectioning. Helps lab technicians conduct their histology work the right way, each and every time.

Additional benefits:

- Contains 10% more volume per can than most competitive offerings
- Optimal functional design: variable pressure trigger and capillary nozzle enable precise cooling or freezing of tissue and help prevent overcooling of specimen
- Does not contain any chlorofluorocarbons (CFCs) or hydrofluorocarbons (HFCs)

#CH7154, 11-oz Can

(288-3139)..... ea

Formalin Filled Tite-Rite™ Containers

Polypropylene

Save time and reduce formaldehyde exposure and spills with prefilled formalin containers designed for the safe collection, preservation, transportation and storage of specimens. Produced from polypropylene and prefilled with 10% neutral buffered formalin.

- Containers have formalin warning labels with a writing area for patient information
- Tite-Rite™ containers have molded graduations and the lids are produced from polyethylene and feature an inner liner to safeguard against leakage

Ameriplast Paraffin™

Made of paraffin and plastic polymers, these 3 Ameriplast paraffins deliver excellent processing and yield thin, flat, and wrinkle-free sections. They were developed to meet the demanding and versatile needs of a laboratory. Paraffin #T8331 contains dimethyl sulfoxide to improve infiltration rate. Paraffin #T8332 consists of a blend of low molecular-weight paraffin and polymers to reduce melting point, which protects tissues from excessive temperature during processing. All paraffin is supplied in 1-kg bags.

Simport Biopsy Foam Pads

Used to hold biopsies in place and prevent them from being lost during processing. Specially formulated foam is always verified for consistency throughout to achieve optimum solvent flow. Biopsy samples are sandwiched between two foam pads and placed either in tissue capsules or cassettes with metal or plastic lids. Resists temperatures from -40°C to 121°C. For use with cassettes.

• Made in the USA

(120-6138)..... 1000/case

Tissue Cassettes with Removable Lids

The 30° angled cassette features an extra-large writing surface and two side panels ideal for labeling. The cassette has an integral lid that snaps apart and securely locks into the base at time of use. The lid can be removed and reattached repeatedly to access the specimen.

- Extra-large textured writing surface
- Wide finger tab on the back of the cassette for easy opening
- Lid is designed to be removed from the base and reinserted into front tabs to lock into place

Diamond™ White Glass Microscope Slides

Produced from hand-selected white glass sheets. White glass provides better optical properties than standard microscope slide glass. The slide is so clear that you see the sample, not the slide. The surface of the slide has low sodium-oxide content and provides a better surface for long-term storage.

- Produced from the finest quality optical white glass
- Better optical properties than most microscope slides
- Packed in high-quality plastic boxes
- Dimensions: 25 mm x 75 mm
- Thickness: 1 mm

**HENRY SCHEIN®****POWERSPIN DXB CENTRIFUGE**

Featuring a variable-speed range of 500 rpm–5500 rpm to ensure a clean and complete separation. Quiet and dependable, with a maintenance-free motor and stainless-steel tube shields, it can be used to process blood, urine, fecal, and other specimens.

- The all-digital front panel has 3 preprogrammed options: 3 min at 4000 g (for BD Barricor™ tubes); 5 min at 3200 g; and 10 min at 2000 g
- Custom settings are easy and intuitive with an all-digital panel and oversized display
- Zero rpm safety latching system prevents lid from being opened while rotor is spinning
- Quiet running—only 50 dB at 3500 rpm
- 99-min digital timer with 1-sec increments
- 500 rpm–5500 rpm in 100 rpm increments
- Remembers last setting for quick repeat runs
- Adjustable acceleration and deceleration
- Stainless-steel rotor chamber for easy cleaning

**HENRY SCHEIN®****POWERSPIN™ LX CENTRIFUGE**

Spin blood, urine, fecal materials, or semen at the best speed for each type of specimen with this powerful, variable-speed, 6-place or 8-place centrifuge. Maintenance-free, brushless motor runs quietly at a fixed speed up to 4000 rpm, emitting only 58 dB, all with low-temperature rise. Suction-cup rubber feet hold unit firmly in place and virtually eliminate vibration. Lid features a gasket to reduced aerosol emission, a window for strobe speed check, and a safety interlock switch that cuts power to the motor if lid is raised. Angled rotor accepts 2–10-mL tubes (maximum tube size 16 mm x 110 mm).

- Speed range: 300–4000 rpm
- 30-min timer
- Stainless steel rotor chamber
- Lid latch safety switch
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb

Make your patients smile in an instant

No one likes to cause a patient pain. You can temporarily ease the pain of common dermatological procedures fast, in just 4-10 seconds! Gebauer's Pain Ease® instant topical anesthetic skin refrigerant has been trusted by healthcare practitioners for over 10 years.

Use it before needle and minor surgical procedures including:

- **Cosmetic injections (Botox® and soft tissue fillers)**
- **Skin tag removal**
- **Minor surgical procedures such as incision and drainage of abscesses or boils, and foreign body removal**
- **Suturing and suture removal**

Botox® is a registered trademark of Allergan, Inc.

Gebauer's
PainEase®
The INSTANT topical anesthetic

Important Risk and Safety Information

Published clinical trials support the use in children 3 years of age and older. Do not use on large areas of damaged skin, puncture wounds, animal bites or serious wounds. Do not spray in eyes. Over spraying may cause frostbite. Freezing may alter skin pigmentation. Use caution when using product on diabetics or persons with poor circulation. Apply only to intact oral mucous membranes. Do not use on genital mucous membranes. The thawing process may be painful and freezing may lower resistance to infection and delay healing. If skin irritation develops, discontinue use. CAUTION: Federal law restricts this device to sale by or on the order of a licensed healthcare practitioner.

Henry Schein # (125-0450)

9525 v.1.06/201

Hylenex[®]
recombinant
(hyaluronidase human injection)

The Hyaluronidase of Choice

-  **#1 prescribed***
-  **Preservative-free**
-  **Over 1 million vials sold**
-  **Used by 7 out of the top 10 hospitals for adult ophthalmology†**
-  **On all major GPO contracts**
-  **Made in the USA in cGMP-compliant facility**
-  **Consistently available**
-  **36-month shelf life**
-  **Supplied in a convenient 4-pack**
-  **Latex-free**
-  **Supported by a dedicated sales team**

Hylenex recombinant
is available through Henry Schein
Order #2480064

About Hylenex[®] recombinant (hyaluronidase human injection)

Indication:

Hylenex recombinant is an endoglycosidase indicated as an adjuvant to increase the dispersion and absorption of other injected drugs.

Important Safety Information:

Contraindications

Hylenex recombinant is contraindicated in patients with known hypersensitivity to hyaluronidase or any of the excipients in Hylenex recombinant. Discontinue Hylenex recombinant if sensitization occurs.

Warnings and Precautions

Spread of Localized Infection: Hyaluronidase should not be injected into or around an infected or acutely inflamed area because of the danger of spreading a localized infection.

Ocular Damage: Hyaluronidase should not be applied directly to the cornea. It is not for topical use.

Adverse Reactions

Allergic reactions have been reported in less than 0.1% of patients receiving hyaluronidase. Anaphylactic-like reactions following retrobulbar block or intravenous injections have occurred, rarely.

The most frequently reported adverse reactions have been mild local injection site reactions, such as erythema and pain. Hyaluronidase has been reported to enhance the adverse reactions associated with co-administered drug products.

Drug Interactions

Furosemide, the benzodiazepines, products containing sodium metabisulfite (e.g. in local anesthetic products containing epinephrine) and phenytoin are incompatible with hyaluronidase.

Hyaluronidase should not be used to enhance the dispersion and absorption of dopamine and/or alpha agonist drugs.

When used with local anesthetics, hyaluronidase hastens the onset of analgesia and shortens its duration of effect, and increases the incidence of systemic reactions.

Patients receiving large doses of salicylates, cortisone, ACTH, estrogens or antihistamines may require larger amounts of hyaluronidase for equivalent dispersing effect.

Available by prescription only.

**Please see the accompanying Brief Summary of Hylenex recombinant on the following page.

HYLENEX recombinant (hyaluronidase human injection) 150 USP units/mL Rx Only

BRIEF SUMMARY OF FULL PRESCRIBING INFORMATION

This Brief Summary does not include all the information needed to use HYLENEX recombinant safely and effectively. See full prescribing information for HYLENEX recombinant by visiting www.hylenex.com.

To report SUSPECTED ADVERSE REACTIONS, contact Halozyme Therapeutics, Inc. at 1-877-877-1679 or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

INDICATIONS AND USAGE

Subcutaneous Fluid Administration

HYLENEX recombinant is an endoglycosidase indicated as an adjuvant in subcutaneous fluid administration for achieving hydration. When solutions devoid of inorganic electrolytes are administered subcutaneously, hypovolemia may occur. This may be prevented by using solutions containing adequate amounts of inorganic electrolytes and/or controlling the volume and speed of administration.

Dispersion and Absorption of Injected Drugs
HYLENEX recombinant is an endoglycosidase indicated as an adjuvant to increase the dispersion and absorption of other injected drugs.

Subcutaneous Urography

HYLENEX recombinant is an endoglycosidase indicated as an adjunct in subcutaneous urography for improving resorption of radiopaque agents.

CONTRAINDICATIONS

HYLENEX recombinant is contraindicated in patients with known hypersensitivity to hyaluronidase or any of the excipients in HYLENEX recombinant. A preliminary skin test for hypersensitivity to HYLENEX recombinant can be performed. The skin test is made by an intradermal injection of approximately 0.02 mL (3 Units) of a 150 Unit/mL solution. A positive reaction consists of a wheal with pseudopods appearing within 5 minutes and persisting for 20 to 30 minutes and accompanied by localized itching. Transient vasodilation at the site of the test, i.e., erythema, is not a positive reaction. Discontinue HYLENEX recombinant if sensitization occurs.

WARNINGS AND PRECAUTIONS

Spread of Localized Infection

Hyaluronidase should not be injected into or around an infected or acutely inflamed area because of the danger of spreading a localized infection. Hyaluronidase should not be used to reduce the swelling of bites or stings.

Bites or stings

Hyaluronidase should not be used to reduce the swelling of bites or stings.

Ocular Damage

Hyaluronidase should not be applied directly to the cornea. It is not for topical use.

Enzyme Inactivation with Intravenous Administration HYLENEX recombinant should not be

administered intravenously. Its effects relative to dispersion and absorption of other drugs are not produced when it is administered intravenously because the enzyme is rapidly inactivated.

ADVERSE REACTIONS

The following adverse reactions have been identified during post-approval use of hyaluronidase products. Because these reactions are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequency or establish a causal relationship to drug exposure.

The most frequently reported adverse reactions have been mild local injection site reactions such as erythema and pain. Hyaluronidase has been reported to enhance the adverse reactions associated with co-administered drug products. Edema has been reported most frequently in association with subcutaneous fluid administration. Allergic reactions (urticaria or angioedema) have been reported in less than 0.1% of patients receiving hyaluronidase. Anaphylactic-like reactions following retrobulbar block or intravenous injections have occurred, rarely.

When solutions devoid of inorganic electrolytes are administered subcutaneously, hypovolemia may occur. As with all parenteral fluid therapy, observe effect closely, with the same precautions for restoring fluid and electrolyte balance as in intravenous injections.

DRUG INTERACTIONS

It is recommended that appropriate references be consulted regarding physical or chemical incompatibilities before adding HYLENEX recombinant to a solution containing another drug.

Furosemide, the benzodiazepines, products containing sodium metabisulfite (e.g., in local anesthetic products containing epinephrine) and phenytoin have been found to be incompatible with hyaluronidase.

Drug-Specific Precautions

Hyaluronidase should not be used to enhance the dispersion and absorption of dopamine and/or alpha agonist drugs.

Local Anesthetics

When hyaluronidase is added to a local anesthetic agent, it hastens the onset of analgesia and tends to reduce the swelling caused by local infiltration, but the wider spread of the local anesthetic solution increases its absorption; this shortens its duration of action and tends to increase the incidence of systemic reaction.

Salicylates, Cortisone, ACTH, Estrogens and Antihistamines

Patients receiving large doses of salicylates, cortisone, ACTH, estrogens or antihistamines may require larger amounts of hyaluronidase for equivalent dispersing effect, since these drugs apparently render tissues partly resistant to the action of hyaluronidase.

USE IN SPECIFIC POPULATIONS

Pregnancy

Pregnancy Category C. In an embryo-fetal study, mice have been dosed daily by subcutaneous injection with recombinant human hyaluronidase at dose levels up to 2,200,000 U/kg. The study found no evidence of teratogenicity. Reduced fetal weight and increased numbers of fetal resorptions were observed, with no effects found at a daily dose of 360,000 U/kg, which represents several orders of magnitude over the

suggested human dose range of 50-300 U of HYLENEX recombinant (0.8-5 U/kg in a 60 kg subject). In a pre- and postnatal development study, mice have been dosed daily by subcutaneous injection with recombinant human hyaluronidase at dose levels up to 1,100,000 U/kg. The study found no adverse effects on sexual maturation, learning and memory of offspring, or their ability to produce another generation of offspring. It is also not known whether HYLENEX recombinant can cause fetal harm when administered to a pregnant woman. HYLENEX recombinant should be given to a pregnant woman only if clearly needed.

Labor and Delivery

Administration of hyaluronidase during labor was reported to cause no complications; no increase in blood loss or differences in cervical trauma were observed.

Nursing Mothers

It is not known whether hyaluronidase is excreted in human milk. Because many drugs are excreted in human milk, caution should be exercised when hyaluronidase is administered to a nursing woman.

Pediatric Use

Clinical hydration requirements for children can be achieved through administration of subcutaneous fluids facilitated with HYLENEX recombinant. The dosage of subcutaneous fluids administered is dependent upon the age, weight, and clinical condition of the patient as well as laboratory determinations. It is recommended that in patients with mild to moderate dehydration, only isosmolar/isotonic fluids, such as normal saline or lactated Ringer's, be delivered via Hylenex recombinant-facilitated subcutaneous (SC) infusions. The potential for chemical or physical incompatibilities should be kept in mind. The rate and volume of subcutaneous fluid administration should not exceed those employed for intravenous infusion. For premature infants or during the neonatal period, the daily dosage should not exceed 25 mL/kg of body weight, and the rate of administration should not be greater than 2 mL per minute. During subcutaneous fluid administration, special care must be taken in pediatric patients to avoid over hydration by controlling the rate and total volume of the infusion.

Geriatric Use

No overall differences in safety or effectiveness have been observed between elderly and younger adult patients.

Mariah S., Claim Resolution

With our expert back-office teams and knowledge from our network of 99,000 providers, athenahealth takes on your administrative work at speed and at scale—better than any one medical group possibly could.

Work less, achieve more. Guaranteed.

If you're not satisfied with the amount of work we've saved you after 18 months, we'll give you a refund of six months of service fees when you switch vendors.*

Visit athenahealth.com/henry-schein-lesswork to learn more.

EHR | Practice Management | Care Coordination | Patient Engagement

If Henry Schein customers purchase service or product from promotional services or products organizations, Henry Schein will earn a fee from such organization.

This is an athenahealth offer. No value is being offered or provided by HSM.

* Provided that Client (i) purchases the athenaOne services through an Athena Services Agreement containing the terms of the guarantee, (ii) is not owned or controlled by another entity, and (iii) uses the athenaOne services in accordance with the Service Description, in the event that Client provides notice to athenahealth of its intent to terminate its Athena Services Agreement based on the fact that Client is not satisfied with the work that athenahealth is doing on Client's behalf, and provides such notice within 30 days of the eighteen (18) month anniversary of the date Client goes live on the athenaOne services, athenahealth will provide Client with a refund of the last six months of service fees paid during the six months prior to Client providing notice of termination.

EARN UNLIMITED 2% CASH BACK²

on qualifying Henry Schein and travel purchases.

NO ANNUAL FEE¹

NO FOREIGN TRANSACTION FEE¹

0% INTRO APR¹

on purchases for the first 6 billing cycles.

Apply Today at www.HenryScheinCreditCard.com/unlimited

Please see the Summary of Credit Terms provided at time of application for important information on rates, fees, costs, conditions and limitations.

You must pay your entire statement balance (including all promotional purchase and balance transfer balances) by the due date each month to avoid being charged interest on new purchases from the date those purchases are made, unless your new purchases are subject to a 0% interest rate.

¹ After the introductory rate expires, your APR for purchases will vary based on the Prime Rate (15.49% APR or 18.49% APR, based on your creditworthiness). The APR for balance transfers will vary based on the Prime Rate (15.49% APR or 18.49% APR, based on your creditworthiness). The APR for cash advances will vary (25.74% APR). This APR will vary with the market based on the Prime Rate. The Minimum Interest Charge is \$1.75. The Transaction Fee for Cash Advances and certain "Cash Equivalent Transactions" is the greater of \$15 or 5% of the transaction. The Transaction Fee for Balance Transfers is the greater of \$10 or 5% of the transaction. Rates are accurate as of February 2017.

² See Rewards Terms and Conditions in the Summary of Credit Terms provided at time of application. Your % back rewards are earned as points. Cash back applies to points redeemed for an ACH deposit to savings/checking account, a statement credit or a check.

Cards are issued by First Bankcard®, a division of First National Bank of Omaha, pursuant to a license from MasterCard International Incorporated. MasterCard and the MasterCard Brand Mark are registered trademarks of MasterCard International Incorporated.

The Leader in Diagnostic Accuracy

Accurate, informed
decision making at the
point of care.

Speed is a necessity.
Accuracy is essential.

97% of physicians believe using
VisualDX improved patient care.

In a random, blind study, VisualDX
improved diagnostic accuracy
more than **120%**.

Clinicians save up to **26 minutes**
per day when using VisualDX.

The Value of VisualDX:

Tackle Challenging Diagnoses. Build a custom differential in seconds. VisualDX shows variation of disease to solve complex patient presentations.

The Power of Visualization. Combine the world's top medical image library and the exclusive Sympticon™ technology to visualize diseases, symptoms, and drug eruptions.

Medicine's Fastest Second Opinion. With VisualDX, get access to specialty level knowledge at the point of care.

Enhanced Patient Satisfaction. Share images and disease information with patients to build confidence and strengthen the patient-clinician relationship.

Discover. Connect. Transform.

Powered By

For five years, the Best in KLAS Awards Software & Services Report has recognized VisualDx as a Category Leader in Clinical Decision Support: Point of Care Clinical Reference.

"VisualDx is a useful and powerful tool – a must-have software for all general practitioners. VisualDx gives me the information I need at the point of care to avoid misdiagnosis and avoid unnecessary tests and prescriptions. By simply entering a patient's findings, I can quickly see what other symptoms to look for, what questions to ask, and it quickly guides me to a differential diagnosis right in front of the patient."

– Dr. Michel Arnould, MD, Family Medicine Physician
